

## **Social Media Coordinator**

We are looking for a volunteer to assist our management team in developing, implementing and monitoring our social media strategy.

This will include creating and collating suitable content for our website as well as other social media platforms such as Instagram, facebook etc; with the use of visually appealing and informative content we hope to share the results of 25 years of successful habitat creation, our current initiatives as well as the plans for the future.

We envisage that most of this voluntary work might be engaged remotely, but your facility to travel occasionally to the Reserve would be rewarding. If you are interested in the position, please contact James Moss, the manager of the reserve, via email [jamesmoss.wildlife@gmail.com](mailto:jamesmoss.wildlife@gmail.com).

Kingfishers Bridge Nature Reserve, which is located just 10 miles north east of Cambridge, has transformed 250 acres of farmland into a variety of wetland habitats to become a vital sanctuary for numerous endangered and threatened fenland species.
